

– COVID 19 –

The RUBIX POD

has been used in Japan to monitor the disinfection  
process of the Diamond Princess

Toulouse, 3 juin 2020 - RUBIX Senses & Instrumentation, the France based IoT start-up specialized in the development of connected devices aiming at the monitoring and identification of both outdoor and indoor nuisance factors, ( Gas, odors, sounds, particles ...) announced today that one of its product, the **RUBIX POD** has been used to monitor the disinfection process of the Diamond Princess in Japan.

The Diamond Princess, a cruise ship, that was quarantine in Japan due to a large number of passengers infected by the COVID 19 has been recently completely disinfected by the Japan Special Cleaning Association. <https://www.riskbenefit.co.jp/business/kodokushi/>

The association is specialized in disinfection procedure and did use our RUBIX POD to insure and document the fact that the complete deodorization of the ship was performed.

The association says « we have used the RUBIX Module to « visualize » the odors and allows to confirm and document the perception That allows the customers to feel inform and safe.

*in spite of the fact that the premises were not accessible for a while. Says Japan Special Cleaning Association.*

This success confirms the help that is provided by RUBIX Technologies to reestablish indoor environment safety and wellness standards with RUBIX online monitoring of salubrity

The RUBIX POD is dedicated Human Resources managers and Facility Managers to ensure safer premises

*“This successful use case of our technology is another important milestone in our development. That will help us to intensify our customer support efforts around the monitoring of the disinfection processes in the difficult pandemic time aiming at helping to insure the cleanness and the safety of the environment to bring the confidence back of the coworkers and customers in their indoor environment. We are very proud to have great customers like Japan Special Cleaning Association and Analytixense in Japan that can does expend the usage of our technologies. We do have now the resources to accelerate our transformation into a service provider of decision making and acting data to the prominent companies that we do serve and develop as well a more recurrent business model ”* **Jean-Christophe Mifsud**, CEO and founder of RUBIX SI.

#### **About RUBIX Senses & Instrumentation:**

Founded in 2016, RUBIX SI develops connected devices combining miniaturized sensors and unique “nuisance recognition” algorithms able of monitoring the surrounding environment. Its objectives: analyzing and identifying sources of nuisance (temperature, light, noise, gas, odors, particles, etc.) and triggering the adequate remediation in order to maximize wellness at work and productivity of coworkers and customers, by minimizing those sources off nuisances.

RUBIX SI has therefore developed a range of connected professional devices efficiently establishing mapping of physical, chemical and biological pollution inside buildings and outside with its RUBIX POD and WT1 product line.

The company’s team cumulates more than 200 years of experience in the field of sensors with a particular expertise in gas sensors, COVs and odors.

The applications targets in priority the outdoor environment with smart cities, Industrial parks, waste management sites and seaport authorities, as well as the indoor environment with open spaces, facility managers, Department stores, and hospitals.

RUBIX has several worldwide customers in the Fortune 500 and aims at developing sales network partnership in order to serve in a B2B mode those different markets.

RUBIX SI also develops dedicated connected objects associated to professional databases, which can be tailored according to the users’ needs and expectations. The company is already particularly active as well in the transportation, (cars, trains and planes, household

appliances and healthcare industries) and smart health via non invasive wearables devices to monitor various pathologies in collaboration with major players in those segments .

RUBIX is honored to have EVOLEM, ACTIV INVEST, PURETERRA, AIRBUS Ventures, ADP Ventures and M Capital as investors
